MCHIP Strategy for Accelerating Scale Up of Interventions to Prevent and Treat Postpartum Hemorrhage

Koki Agarwal
Director MCHIP
Jhpiego

20 Nov 2009

MCHIP at a Glance

Our Vision		To accelerate the reduction of maternal, newborn and child mortality in the 30 USAID priority countries facing the highest disease burden			
Our Goal		To scale up evidence-based, high impact maternal, newborn and child health (MNCH) interventions to help reduce maternal and child mortality by 25% across 30 priority countries through field-based implementation and global leadership			
Our Contribution		<ul style="list-style-type: none"> Introduce and/or improve and expand implementation of high-impact interventions through local implementing partners (Ministries of Health, NGOs, and donor-funded projects); Global Leadership through advancing implementation research Program learning; Technical assistance to share SOTA practices along the MNCH and household-to-hospital continua of care 			
Scope	Thematic	Skilled Birth Attendance	Neonatal Care	Zinc	Maternal Anemia
		PPH	CBT for Pneumonia	Immunization	Family Planning
		PE/E	ORT	Wat/San	Malaria
		PVO/NGO support, Equity, HSS, P4P (x-cutting)			
	Geographic	Year 1 & 2: Kenya, Mali, Mozambique, India, So Sudan, Nigeria, DRC, Swaziland, South Africa, Burkina Faso, Ghana. Swaziland, Malawi, Tanzania, Indonesia, Nepal, Bangladesh, Paraguay, Bolivia, Honduras, Guatemala			
Timeframe		2008-2013

- BASICS
- ImmunizationBASICS
- POPPHI
- Child Survival Tech Support +
- ACCESS FP
- Jhpiego
- Save the Children
- John Snow, Inc
- MACRO
- Johns Hopkins (IIP)
- PATH
- Broad Branch
- PSI

Build and Expand on ACCESS and POPPHI Achievements

- ACCESS expanded AMTSL to prevent PPH in over 20 countries
- Introduced Misoprostol in Nepal and Afghanistan in community settings
- Hosted a regional meeting in Africa for 350 individuals from over 22 countries
- Provided small grants to 7 NGOs in 6 countries
- Developed materials and resources for global dissemination in collaboration with POPPHI
- Initiated preservice education for EmONC including PPH in Tanzania, Malawi, Ethiopia and Ghana

MCHIP's Goal for PPH Prevention and Treatment

- Ensure that ACCESS and POPPHI countries are supported to achieve greater results
- Support at least 20 of HIDN's priority countries to scale up and provide routine monitoring data on PPH prevention and treatment programs
- Continue a global effort to encourage partners to commit to scaling up PPH prevention and treatment
- Build on existing knowledge and efforts, using tested tools and approaches

MCHIP Approach

- Global level
- Regional level
- Country level

Global Level

- Form a PPH consortium to continue global level advocacy and consensus building
- Work with UN bodies, FIGO, ICM and other global organizations to include indicators to measure progress on PPH
- Collaborate with research organizations to determine the simple interventions for PPH including use of oxytocin in Uniject, hydrostatic tamponade, misoprostol treatment
- Include PPH as a major focus in global meetings - i.e. Maternal Health Task Force and Women Deliver meetings

USAID
FROM THE AMERICAN PEOPLE

Maternal and Child Health
Integrated Program

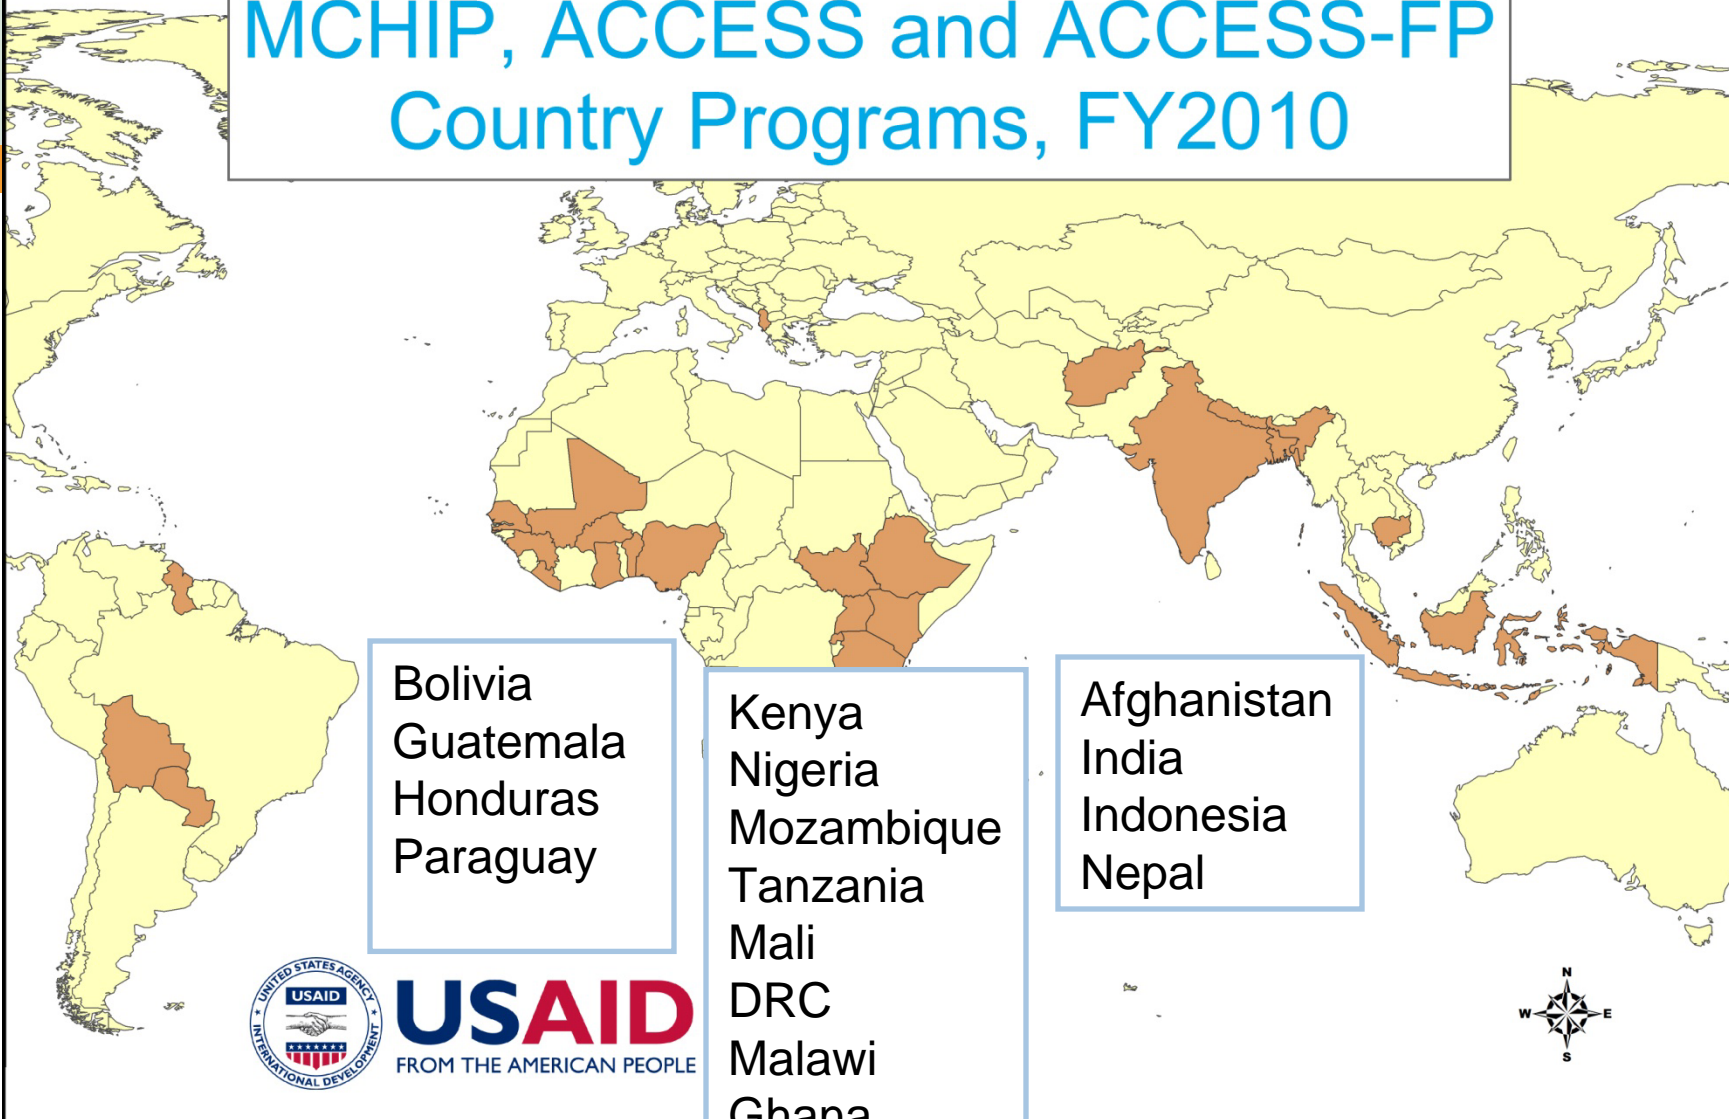

Regional Level

- Ensure prominence of PPH prevention and treatment sessions in regional meetings as well as best practices in scaling them up.
- Encourage regional organizations to position and/or maintain PPH as a priority intervention to achieve the MDGs.
- Set up a regional collaborative or network to ensure multi-country work on measuring and reporting on PPH
- Support regional meetings on PPH

Country Level

- Use the QoC survey in 8-10 countries to demonstrate gaps in PPH prevention and treatment
- Expand the use of SBM R to improve quality of services for AMTSL
- In a program learning setting expand community-based distribution of misoprostol to at least four countries in Africa and support scale up in 3 countries in Asia
- Use innovative strategies for scale up; e.g. Cambio and training approaches like SAIN
- Identify champions that promote PPH prevention at the country and regional level
