TIMELINE

AMTSL = GATPA - Gestion active de la troisième période de l'accouchement

2007

GATPA training integrated into essential newborn care curriculum

DSR validates new curriculum

2008

Regional trainers and providers Trained on AMTSL

Support was provided to DSR and SNIS to organize a workshop to review and harmonize the list of RH indicators (and add AMTSL and ENC)

Training of Regional and district supervisors as well as midwives to use new HMIS tools

Support was provided to DSR and SNIS to review existing RH reporting tools, develop the required indicators and provide TA on data quality

2009

Training of providers on new HMIS tools

Support to SNIS to reproduce new HMIS tools

Collection and review of data on a quarterly basis

AMSTL in Senegal: Achievements

	# of people trained	# of women who received AMSTL in facilities at delivery (%)	# of facilities covered (%)	Estimated prevented cases of PPH **
Year Two	509	47,946 (75% of all births attended by a qualified provider)		3,581
Year Three		40,545 (83% of births attended by a qualified provider– to date only 40% of data received)	100 %	2,735
TOTAL	564	88,491 (thus far...)	493* (100%)	6,316

*Health posts and centers in MNCH/FP regions: Louga, Thiès, Kaolack, Kolda, Ziguinchor

**Estimate is based on 9% incidence and reduced RR=0.38 with AMSTL

Number of women receiving Active Management of the Third Stage of Labor

Year 3 data represents half the year
